

KEY STAGE 2
MATHEMATICS TESTS

ANSWERS & MARK SCHEMES

About the KS2 Maths Practice Papers

There are three **full** sets of **KS2 Maths Practice Papers** within this book. Each set of KS2 Maths Practice Papers consists of three separate papers: **Paper 1 (Arithmetic)**, **Paper 2 (Reasoning)** and **Paper 3 (Reasoning)**. Calculators are **strictly not allowed** for **any** of these tests.

This pencil sign means that an answer needs to be written either where indicated by the pencil or in the position instructed in the question.

Some questions will have an answer box that says “Show your working”. Children should use this space to write out their working and their final answer in the smaller box within it. This way, even if a child ultimately gets the answer wrong, they could still be awarded marks for approaching it in the right way.

Paper 1 (Arithmetic)

Paper 1 lasts for **30 minutes** and is out of a total of **40 marks**.

Paper 2 (Reasoning) and Paper 3 (Reasoning)

Paper 2 and Paper 3 each last for **40 minutes** and have a total of **35 marks** each.

Marking and Assessing

Once your child has completed a test, mark it using the **Answers and Mark Schemes** within this book, add up the marks and enter them in the table below. After completing a full set of papers, add up the scores for Paper 1, Paper 2 and the Paper 3 to get a total out of **110**.
