

Engineering Minds

**@ ST. LUKE'S CE
PRIMARY SCHOOL**

Years 1, 2, 3 – Mondays

Years 4, 5, 6 – Thursdays

Time: 3:30pm – 5:10pm

Fee: £180/ term

12 sessions @ £15/ session

Join a new season of **LEGO Robotics**

INSPIRE YOUR CHILD INTO ENGINEERING AND CODING

Engineering Minds' classes bring science and computing to life through hands-on tasks stemming from real-world problems, **using** a wide range of methods and tools such as **LEGO building, engineering** and **coding**.

Every week children build robots using LEGO bricks, learning to work with Bluetooth Smarthubs, motors, motion and tilt sensors that allow them to program the robots and get them to execute different tasks.

For September 2022, children will work on an exciting new curriculum that will allow them to **explore STEM topics**, continue their progression, develop new skills and build & code new and inspirational models.

During the Autumn term, children will be working on the **First LEGO League 2022 Theme Cargo Connect** - which will get them to explore the domain of Transportation of Goods around the world.
